

CRITICAL THINKING		CREATIVE THINKING
Ability to think and action clearly is critical thinking.		when problem is solved, thinking different types of that problem is creative thinking.
for example-Evaluation		for example-Assignment problem
As we face evaluation every Monday and we have within one hour. We think problem and take action according to that. that should be clear in the head then it will work.		As we get Assignment everyday and we don't get time bound. when problem is solved, thinking that that problem in different way.
